Professional Summary

Application Security Engineer Aspirant with practical exposure in Penetration Testing, Web Application Security, Vulnerability Assessments, Security Information and Event Management Systems (SIEMs) and Capture The Flag (CTF) contests. Skilled in Python, Java, Burp Suite, Nmap, Wireshark, Metasploit, OWASP Top 10, Linux and Git. Interested in discovering security vulnerabilities and creating secure systems.

Education

M.Tech Integrated – Computer Science and Engineering Sri Krishna College of Engineering and Technology-CGPA: 7.06/10	2022-2027
Higher Secondary Education (Class XII) KRP Matric Higher Secondary School-Percentage: 69%	2021-2022
Secondary School Leaving Certificate (Class X) KRP Matric Higher Secondary School-Percentage: 79%	2019-2020

Experience

Penetration Tester Intern – Hackersdaddy

- Conducted thorough reconnaissance, vulnerability assessment, and exploitation exercises within an isolated laboratory environment based on structured ethical hacking approaches.
- Conducted analysis for different types of attacks such as SQL Injection, Cross-Site Scripting (XSS), Cross-Site Request Forgery (CSRF), and Brute Force.

CTF Team Member – Flagsomnia a.k.a TamilCTF

- Solved challenges across Web Exploitation, Cryptography, Digital Forensics, and Reverse Engineering categories under time-constrained and competitive conditions. Consistently contributed to the team's score by tackling intermediate to advanced difficulty problems that required creative out-of-the-box thinking.

Projects

AI-Based Lightweight SIEM System for Real-Time Threat Detection

- Developed a scalable SIEM platform design that was able to process and correlate logs in real time from several remote agents running on different endpoints.
- Designed the application following secure development practices aligned with Secure SDLC principles
- Developed a rule-based Intrusion Detection System (IDS) to detect and raise alarms for common attack types like SQL Injection, Brute Force, and Port Scanning attacks. Rules were written based on attack signatures and validated against malicious traffic.

Achievements

- Advanced to Stage II of Pentathlon 2024 & 2025, a prestigious national-level cybersecurity competition involving multi-round technical challenges across penetration testing, forensics, and cryptography.
- Won first place at the Yugam 2024 NOVA CTF, outperforming multiple competing college teams across a diverse and challenging set of cybersecurity problems.

Certifications & Platform

- Certified Social Engineering Defense Practitioner (CSEDP) – SecOps Group
- Certified Network Security Professional – SecOps Group
- Google Cybersecurity Professional Certificate – Coursera
- TryHackMe tryhackme.com/p/w4r4n
- HackTheBox – profile.hackthebox.com

Technical Skills

CyberSecurity Vulnerability Assessment, Penetration Testing, Security Monitoring, Incident Response

Programming: Python, Java, Data Structures and Algorithms, Operating Systems, CI/CD

Networking: TCP/IP, DNS, DHCP, Routing, Network Security

Security Tools: Wireshark, Nmap, Metasploit, Burp Suite, Docker
